

Automation as Unique as your Lab

A smarter workflow starts here. HemoCell Specialized Lab Automation integrates all phases of Hemostasis testing for optimal efficiency to enhance quality of care and reduce costs. Powered by the new ACL TOP® 770 LAS Hemostasis Testing System and HemoHub Intelligent Data Manager, HemoCell increases walk-away time, to elevate productivity across the lab.

"By automating pre-analytical steps with HemoCell, the lab staff spends less hands-on time with samples, and has more time for other tasks."

— Jayton Zachary, MT(ASCP), Laboratory Hematology Section Manager,
University Medical Center, Lubbock, TX, USA

Customized automation enhances quality and efficiency for Hemostasis laboratories, spanning those processing 60 samples/day to the largest labs, handling 4,000+ samples/day*.

Improve Lab Performance

- Improve auto validation rates to:
 - Achieve consistent turnaround times for routine and STAT testing
 - Reduce time for manual review, enabling staff to focus on critical samples*
- Incorporate additional specialty testing via improved efficiency

Enhance Productivity

- High throughput STAT PT turnaround time <3 minutes*
- Increase walkaway time to enable more time to focus on value-added activities*

Control Costs

- Supports more efficient use of systems, reagents and consumables*
- Low maintenance to preserve operational uptime
- Improve spatial utilization with adaptable footprint

*Data on file.

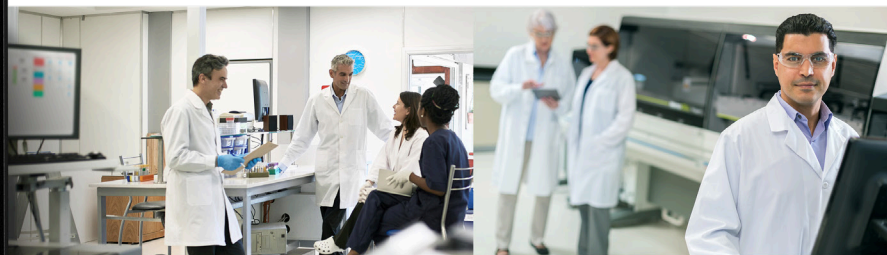

Improve Patient Care

- Reduce sample recollection*
- Facilitate clinical decisions with faster results*

Make your lab a HemoCell lab.

Centralized Management for Hemostasis Testing

Make the connection. Enabling centralized information management, HemoHub Intelligent Data Manager connects across all Werfen Hemostasis Testing Systems—including new ACL TOP Family 70 Series—via secure connection within the network, creating seamless synergy to enhance testing efficiency, streamline workflows, to improve patient care.

“HemoHub Intelligent Data Manager is simple, intuitive, and modern—and was quickly adopted by the lab staff.”

— Dr. Inès Harzallah, Pharmacist Biologist, Head of Hemostasis Laboratory, Group of Mulhouse and the South Alsace Region (GHRMSA), Mulhouse, France

Connectivity

- Status of all connected instruments displayed from a single dashboard
- Monitoring of results in real-time enabled across the entire network

Management of HemoCell

- Intelligent sample routing with real-time adaptations
- Customized sorting and sample banking for traceability and easy retrieval

Quality management

- QC performance display and comparison across multiple systems and generation of key reports
- Allows for automated performance verification studies with ACL TOP Family 70 Series
- Input data generated for peer comparison review with AccuTrak™ 2.0

Lab decision support

- Quickly display, compare, and save reaction curves through an intuitive, customizable curve library
- Access preanalytical information and key performance indicators (KPI) such as HIL for enabling lab decisions
- Robust rule configuration to streamline workflows

HIL= Hemolysis, Icterus, and Lipemia
